

ClimatePath: ISO 14064 Greenhouse Gas Emissions Validation, Verification and Reporting

Achieving carbon neutrality is no longer just an aspiration—it's a strategic necessity.

Global commitments like the Paris Agreement are driving aggressive emission reduction targets, compelling companies to actively mitigate their impact on climate change.

Undergoing **ISO 14064 Greenhouse Gas (GHG) verification** of your company's carbon footprint puts you on the path to set and achieve meaningful environmental and social objectives. This globally recognized standard enhances transparency, informs critical decisions, and supports participation in programs like emissions trading schemes and public reporting. Notably, ISO 14064-3 is accepted by the Carbon Disclosure Project (CDP) for measuring and reporting GHG emissions.

At DoubleHelix, our new GHG validation and verification services guide you through this process. Our data-driven approach leverages in-depth analytics to address current and future risks within your operations and supply chain.

Partner with DoubleHelix to not only meet compliance but to drive strategic environmental leadership in your industry.

Why Act Now

- **Stay Ahead of Regulations:** Compliance is tightening with benchmarks from TCFD and SBTi. Early action avoids fines and positions you as a leader.
- **Financial Benefits:** Carbon foot printing reveals inefficiencies, leading to cost reductions and long-term savings.
- **Investor Confidence:** Transparent reporting boosts investor trust and improves ESG ratings.
- **Competitive Edge:** Consumers prefer sustainable companies. Showcase your commitment to enhance brand loyalty and stand out.
- **Global Competitiveness:** Aligning with ISO 14064 standards gives you an edge in international markets.
- **Risk Mitigation:** Managing your carbon footprint identifies operational risks and builds supply chain resilience.
- **Future-proofing:** Prepare for potential carbon taxes that **could impact your bottom line.**

Proven Success with Industry Leaders

We've helped leading EV charging companies and renewable energy providers achieve carbon neutrality, enabling them to:

- **Enhance Reputation:** Build trust through verified environmental practices.
- **Demonstrate Leadership:** Set industry standards as sustainability pioneers.
- **Access New Markets:** Attract environmentally conscious consumers.

More reasons to consider GHG services

Align with Global Initiatives

- **Paris Agreement & NDCs:** Reduce your carbon footprint to support global climate efforts.
- **UN SDGs:** Contribute to sustainable development and enhance your global standing.
- **Meet TCFD & SBTi:** We assist with reporting needs and setting science-based targets.
- **Recognized Standards:** ISO 14064 verification is acknowledged by the Carbon Disclosure Project (CDP).

Be a Leader in Sustainability

Partnering with Double Helix helps you:

- **Show Commitment:** Improve ESG ratings and attract investors.
- **Engage Employees:** Boost morale and attract talent.
- **Drive Innovation:** Identify inefficiencies and uncover cost savings.
- **Ensure Long-Term Success:** Build resilience against climate-related risks.

Take Advantage of Incentives

- **Government Support:** Access tax breaks and subsidies for pursuing carbon neutrality.
- **Emissions Trading:** Participate in schemes for compliance and potential revenue.

Embrace the Future Confidently

Act now to adapt to climate challenges and secure long-term sustainability.

- **Stay Innovative:** Lead with emerging technologies like carbon capture.
- **Global Expertise:** Navigate international regulations effectively with our support.

Secure Your Sustainable Future Today

Join industry leaders shaping a sustainable future. Let DoubleHelix guide you to carbon neutrality, meeting today's demands and safeguarding tomorrow's opportunities.
